## Enphase Energy Named One of the 2015 Best Places to Work in the San Francisco Bay Area

*Company recognized by the San Francisco Business Times and Silicon Valley Business Journal as a Best Place to Work among large companies*

PETALUMA, Calif.--(BUSINESS WIRE)-- [Enphase Energy, Inc.](#) (NASDAQ:ENPH), a leading global energy technology company, today announced that it has been recognized by the San Francisco Business Times and Silicon Valley Business Journal as one of the 2015 Best Places to Work in the San Francisco Bay Area. Enphase received this acknowledgement based upon the company's corporate philosophy, management best practices, overall benefits and employee feedback.

The Best Places to Work awards celebrate outstanding companies whose employees rate them as the best in the San Francisco Bay Area, in five categories.

"Enphase values out-of-the-box thinking with a willingness to seek continuous improvement and strives to equip its employees with the training and motivation needed to excel in the solar technology industry," said Steve Lapointe, vice president of global human resources at Enphase Energy. "Enphase employees play an active role in transforming the global energy landscape through products that bring quantifiable benefits to society and contribute to a healthier environment."

The assessment and resulting rankings of employers were based on a multiple choice survey taken by employees that provided feedback about management effectiveness, employee engagement, communication strategies, trust in leadership, company benefits, and career growth and challenge, which were then tabulated by the research firm Quantum Workplace.

In 2008, Enphase introduced the solar industry's first commercially distributed microinverter. Since then, Enphase has been awarded the 2014 Global Frost & Sullivan Award for Technology Leadership, named to Greentech Media's 2014 Grid Edge 20 as one of the most innovative companies and recognized as the fastest growing cleantech company in Deloitte's Technology Fast 500™ 2013.

### About Enphase Energy, Inc.

Enphase Energy delivers energy management technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Its semiconductor-based microinverter system converts energy at the individual solar module level and brings a system-based high-technology approach to solar energy generation, storage, control and management.
