

Enphase Energy Expands Executive Leadership Team with International Sales Veteran

Jeff Loebbaka joins Enphase Energy as vice president of worldwide sales to lead global expansion

Petaluma, Calif. – June 9, 2010 – Enphase Energy, the leader in solar microinverter systems, today announced that Jeff Loebbaka has joined the executive team as vice president of worldwide sales. Loebbaka brings more than 20 years of management, sales and marketing experience, with a proven track record of developing and executing high-growth sales strategies in highly competitive technology markets. His appointment marks a milestone for Enphase as the company prepares to expand into Europe later this year. Enphase will be previewing its technology at the Intersolar tradeshow in Munich (Booth B3.228).

"As demand for the Enphase Microinverter System continues its rapid growth, we are scaling our sales operations to address the needs of global and high-volume channels," said Paul Nahi, chief executive officer, Enphase Energy. "Jeff's proven leadership in global markets provides essential support for expanding our worldwide presence."

Prior to joining Enphase, Loebbaka was a senior vice president at Seagate Technologies, a leading storage solution provider, where he held multiple senior sales and marketing operational roles. Most recently as senior vice president of Europe, Middle East and Africa, he was responsible for sales, marketing and operations in the region. Prior, as senior vice president of global channel sales and marketing, Loebbaka led efforts that resulted in Seagate's multi-billion-dollar channel business growing by more than 170 percent in two years.

Loebbaka previously was vice president and general manager of Adaptec's desktop solutions business, where he also held the role of vice president of worldwide channels and corporate marketing. He also brings valuable marketing and channel experience from senior marketing leadership roles at companies such as the Life Fitness Division of Brunswick, Zenith Data Systems and Apple.

"Enphase has doubled in size in less than one year and shipped over 300,000 microinverters since the launch of the company. I saw an opportunity to be part of a winning team and knew I had to take it," said Loebbaka. "As Enphase continues its growth trajectory, my priority will be to ensure that the company's technology and product leadership translates into market leadership in all segments and geographies."

**About Enphase**

Enphase Energy provides solar energy management systems for residential and commercial markets. The company offers a system that includes high-efficiency microinverters, communications and Web-based monitoring and analysis. The systems increase energy harvest, improve system reliability and simplify design, installation and management. Founded in 2006 and based in Northern California, the company is led by veterans from the solar and high-tech industries and backed by industry leaders.
