

Enphase Energy Certified to Use WEEB Grounding System

Use of WEEB Grounding Washers Enables Solar Installers
to Reduce Time and Cost of Solar Installations

Petaluma, Calif. – March 2, 2010 – Enphase Energy, the leader in microinverter systems, today announced that it is CSA certified for the WEEB Grounding System ("Washer, Electrical Equipment Bonding"), a family of products used to bond solar photovoltaic (PV) panels to solar racking systems. Solar installers can now use the Enphase Microinverter System with various WEEB grounding products, which can substantially reduce the time and cost of solar installations.

"Enphase Energy is proud to be certified with the industry-leading WEEB Grounding System," said Enphase vice president of marketing, Raghu Belur. "This is another example of Enphase's commitment to giving residential and commercial solar installers the tools they need to further reduce the balance of system costs of their solar installation."

"We are pleased that Enphase Energy has taken this step, since WEEB certification makes it even easier for us to deploy the Enphase Microinverter System," said Ben Davis, vice president of operations, Astrum Solar. "Enphase helps us grow our business and provide high-quality service to our customers. Now with the WEEB Grounding System, we can do that even faster."

Additional benefits of using the WEEB Grounding System include:

- Significantly reduces the amount of copper and the labor time necessary for array grounding
- Only one WEEB per inverter required
- Several WEEB products currently listed as available for Enphase-compatible racking

"Wiley Electronics LLC is excited to add Enphase Energy to our list of certified partners," said Wiley president Brian Wiley. "We value Enphase's commitment to developing new technology for the solar industry and we are honored to partner with them. Our mission is to help bring clean, renewable energy to scale by providing products that are unmatched in quality, ingenuity and reliability. Enphase's WEEB certification extends our craftsmanship all the way down the solar value chain."

**About Enphase**

Enphase Energy provides solar energy management systems for residential and commercial markets. The company offers a system that includes high-efficiency microinverters, communications and Web-based monitoring and analysis. The systems increase energy harvest, improve system reliability, and simplify design, installation and management. Founded in 2006 and based in Northern California, the company is led by veterans from the solar and high-tech industries and backed by industry leaders.
