The Enphase Microinverter System Now Shipping in the United Kingdom

PETALUMA, Calif.--(BUSINESS WIRE)-- [Enphase Energy, Inc.](#) (NASDAQ: ENPH) today announced the Enphase[®] Microinverter System is immediately available through authorized distributors throughout the United Kingdom. Enphase [recently announced](#) the availability of Enphase products at [Dynamic Solar](#), and solar installers and integrators can now also purchase Enphase products at [CJ Solar](#), [Metgen](#), [Rexel](#) and [Solar Europa](#).

"Enphase brings to the UK a history of product reliability and performance in addition to access to localized training and support. Our products are now shipping to leading distributors with extensive national networks to ensure that customers are able to quickly get started installing Enphase anywhere in the UK," said Paul Nightingale, country manager for Enphase Energy UK.

The Enphase Microinverter System combines [Enphase M215 Microinverters](#), the [Envoy Communications Gateway](#) and [Enlighten](#) web-based monitoring and analysis software to deliver solar systems with increased design flexibility, simplified installation and remote system management. Enphase technology is installed in over 44,000 solar systems and the company has shipped over 2.2 million microinverters to customers in Europe and North America.

Enphase M215 Microinverters work with most 60-cell solar modules and come standard with a 20-year limited warranty. They are certified for installation in the UK and conform to UK standard ENA G83/1-1. Learn more about the Enphase Microinverter System for the UK at www.enphase.co.uk.

How to Buy

For Enphase training information in the UK, contact UK Trainer Richard Smith at rismith@enphaseenergy.com.

About Enphase Energy, Inc.

Enphase Energy delivers microinverter technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Our semiconductor-based microinverter system converts energy at the individual solar module level and brings a systems-based, high technology approach to solar energy generation. Forward-Looking Statements

This press release contains forward-looking statements, including, but not limited to, statements related to market demands for Enphase microinverters, advantages of its technology, market trends and future reliability and performance. These forward-looking statements are based on the company's current expectations and inherently involve significant risks and uncertainties. The timing of events could differ materially from those anticipated in such forward-looking statements as a result of these risks and uncertainties, which include, without limitation, risks related to: the future demands for solar energy solutions; the reduction, elimination or expiration of government subsidies and economic incentives for on-grid solar electricity applications; the company's ability to achieve broad market acceptance of its microinverter systems and to develop new and enhanced products in response to customer demands and rapid market and technological changes in the solar industry; the success of competing solar solutions that are or become available; the company's ability to maintain or achieve anticipated product quality, product performance and cost metrics; and other risks detailed in the "Risk Factors" and elsewhere in Enphase Energy's Securities and Exchange Commission filings and reports, including its Quarterly Report on Form 10-Q for the quarter ended June 30, 2012. Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events or changes in its expectations.
