Enphase Energy Announces North America Installer Tour: Enphase Experience Roadshow 2012

Mobile event connects solar installers with hands-on demonstrations of latest microinverter products and tools

PETALUMA, Calif.--(BUSINESS WIRE)-- [Enphase Energy, Inc.](#), (NASDAQ:ENPH) today announced the tour schedule for the Enphase Experience Roadshow 2012, where solar installers, building contractors, engineers and solar enthusiasts will participate in hands-on training and demonstrations of the full capabilities of the Enphase[®] Microinverter System. The annual roadshow kicks off in Petaluma, Calif., on Monday, April 30 and will continue for more than 80 days across the United States and Canada, stopping in 33 cities as voted by Enphase customers and [online community members](#).

"Enphase designed this tour for our solar customers and community. We asked them to vote for their cities and committed to visit as many as possible," said Bill Rossi, chief marketing officer of Enphase Energy. "Not only are we able to demonstrate the advantages of our microinverter technology on the annual Roadshow but also engage in meaningful and productive conversations directly with our installer community."

Each stop of the tour will feature Microinverter System enhancements and tools to help solar installers grow their businesses, including:

- ▮ New balance-of-system products that further streamline solar installations
- ▮ Access to the Enlighten 3.0 Beta and the next generation of monitoring and mobile solutions that simplify processes
- ▮ A preview of the Enphase Metering and Management Solution, which includes a revenue grade meter for financed residential solar systems

The tour begins on Monday, April 30 at Enphase Energy's new corporate headquarters at 1420 North McDowell Boulevard in Petaluma, Calif., from 11:30 a.m. - 4:00 p.m. Each free event will include food, contests and giveaways.

About Enphase Energy, Inc.

Enphase Energy delivers microinverter technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Our semiconductor-based microinverter system converts energy at the individual solar module level and brings a systems-based, high technology approach to solar energy generation.
