

## Enphase Energy Expands IQ8 Microinverter Deployments in Maryland

FREMONT, Calif., Feb. 23, 2023 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#) (NASDAQ: ENPH), a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems, announced today that installers of Enphase® products in Maryland have seen growing deployments of Enphase Energy Systems™ powered by [IQ8™ Microinverters](#).

According to the U.S. Solar Market Insight report from Wood Mackenzie and the Solar Energy Industries Association, residential solar deployments in Maryland are forecast to reach approximately 92 MW in 2023, representing a 25 percent increase from the previous year. Additionally, residential battery deployments in Maryland are expected to grow more than eight-fold by 2026, according to the most recent U.S. Energy Storage Monitor report from the Energy Storage Association and Wood Mackenzie.

"We find that homeowners demand long term reliability coupled with peak performance – the Enphase IQ8+ Microinverters provide that exact solution," said Ryan Farrell, vice president of business operations at [Lumina Solar](#), an Enphase Platinum level Installer. "Our partnership with Enphase allows us the opportunity to install top tier components that are backed by industry leading warranties. Lumina's culture is deeply rooted in delivering exceptional customer experience and Enphase has a long track record of matching our core values."

Enphase's revolutionary IQ8-based systems can provide Sunlight Backup™ functionality during an outage even without a battery. For homeowners who want [battery backup](#), there are no sizing restrictions when pairing Enphase IQ™ Batteries with IQ8 Microinverters. With the Sunlight Jump Start™ feature, IQ8 Microinverters can restart a home energy system using only sunlight after a prolonged grid outage that drains the battery. This eliminates the need for a manual restart of the system and gives homeowners greater assurance of energy resilience. Enphase IQ8 solar microinverters are built to last and come with a 25-year limited warranty.

"Homeowners in Maryland are increasingly looking for safe, reliable, and resilient home energy solutions," said Stephen Welsh, president and CEO of [Standard Energy Solutions](#), an Enphase Gold level installer. "The Enphase Energy System, featuring IQ8 Microinverters, gives homeowners more control of their energy needs and costs."

"Our existing and prospective customers love that Enphase's solar and battery systems are cutting-edge technology," said Kaitlyn Swann, logistics director at [Energy Select](#). "IQ8-powered Enphase Energy Systems offer advanced technology features paired with real-time performance monitoring and management."

"We're proud to work with our installer network in Maryland to meet the state's growing demand for solar," said Dave Ranhoff, chief commercial officer at Enphase Energy. "Together, we will continue to provide homeowners in Maryland with access to reliable energy solutions through our high-quality products and services."

### Forward-Looking Statements

This press release may contain forward-looking statements, including statements related to the expected capabilities and performance of Enphase Energy's technology and products, including safety, quality and reliability; the availability and market adoption of Enphase products; growth in deployments of Enphase Energy Systems; and growth in Maryland of residential solar deployments and deployments of residential battery capacity. These forward-looking statements are based on Enphase's current expectations and inherently involve significant risks and uncertainties. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of certain risks and uncertainties, including those risks described in more detail in Enphase's most recently filed Annual Report on Form 10-K for the year ended December 31, 2022 and other documents on file with the SEC from time to time, which are available on the SEC's website at <https://www.sec.gov/>. Enphase Energy undertakes no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, or changes in its expectations, except as required by law.
