Enphase Energy Signs with Leading United Kingdom Solar Distributor

Dynamic Solar now selling the Enphase Microinverter System

PETALUMA, Calif.--(BUSINESS WIRE)-- [Enphase Energy, Inc.](#) (NASDAQ: ENPH) today announced the availability of the Enphase® Microinverter System at [Dynamic Solar](#), a leading distributor of photovoltaic solutions in the United Kingdom. Enphase [recently announced](#) its entrance into the UK solar energy market and has established a local UK office in [Milton Keynes, England](#).

"After successful M215 Microinverter testing across the UK, our momentum continues with the appointment of our first authorized distributor: Dynamic Solar in Cambridge. Dynamic has extensive expertise in solar PV and will work closely with installers on the purchasing and timely delivery of the Enphase Microinverter System throughout the UK," said Paul Nightingale, country manager for Enphase Energy UK.

The Enphase Microinverter System consists of [Enphase M215 Microinverters](#), the [Envoy Communications Gateway](#) and [Enlighten](#) web-based monitoring and analysis software. Connecting every module in a solar array to an Enphase microinverter allows each to operate independently, increasing design flexibility and maximizing system performance. The high-tech Enphase Microinverter System creates a networked solar array that can be monitored and managed remotely over the Internet through Enlighten. This added layer of intelligence gives installers the tools to track performance and manage their Enphase systems without costly site visits.

Enphase M215 Microinverters are certified for installation in the UK and conform to UK standard ENA G83/1-1.

How to Buy

The Enphase Microinverter System is available to purchase now at [Dynamic Solar](#). Installers can contact them directly for locations and pricing information.

Dynamic Solar Ltd
13 Barnwell Business Park

Visit Enphase Energy at Solar Power UK 2012 (Booth #C90):

Enphase Energy will be showcasing the Enphase Microinverter System at [Solar Power UK](#) from October 2-4, 2012, in Birmingham, England. Event attendees can become familiar with the numerous benefits that selling, installing and maintaining Enphase-based solar arrays can provide through interactive product demonstrations. Enphase's expert technical staff will also be available to help booth visitors learn how to get started installing Enphase in the UK.

About Enphase Energy, Inc.

Enphase Energy delivers microinverter technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Our semiconductor-based microinverter system converts energy at the individual solar module level and brings a systems-based, high technology approach to solar energy generation. Connect with Enphase on [Facebook](#) and follow us on [Twitter](#). www.enphase.com
