

Enphase Energy Launches 'Full Throttle' Sales Promotion

Installers can earn up to \$5,000 during promotion period

Petaluma, Calif. – April 6, 2010 – Enphase Energy, the leader in solar microinverter systems, today launched its multimillion dollar 'Full Throttle' sales promotion, which provides cash awards up to \$5,000 to solar installers using Enphase Microinverter Systems. The promotion applies to systems installed between April 1, 2010 and July 31, 2010.

"In 2009, we were thrilled with the level of demand for our microinverter systems," said Andrew Nichols, vice president of sales for Enphase Energy. "We created the Full Throttle promotion to make 2010 an even more exciting year for both Enphase and our customers."

More details on the Full Throttle program can be found on the Enphase Web site at www.enphaseenergy.com or by clicking [here](#).

"A growing number of solar customers ask for Enphase technology by name," said Paul Benson, chief executive officer, Focused Energy, a distributor of Enphase products. "Not only has Enphase quickly ramped up production to meet this demand, but they have also introduced this generous promotion to reward our installer customers for their continued loyalty."

The Full Throttle promotion follows Enphase's successful strategic expansion of manufacturing capacity over the last year. This expansion includes the launch of a manufacturing facility in Ontario, Canada,

which manufactures products that qualify for the Ontario Power Authority's feed-in tariff program.

Enphase Energy has shipped more than 250,000 microinverters since launching the product in mid-2008.

About Enphase

Enphase Energy provides solar energy management systems for residential and commercial markets. The company offers a system that includes high-efficiency microinverters, communications and Web-based monitoring and analysis. The systems increase energy harvest, improve system reliability and simplify design, installation and management. Founded in 2006 and based in Northern California, the company is led by veterans from the solar and high-tech industries and backed by industry leaders.
