Enphase Energy Adds Talent and Depth to Fuel Growing Business

PETALUMA, Calif., Nov. 15, 2012 (GLOBE NEWSWIRE) -- [Enphase Energy, Inc.](#), (Nasdaq:ENPH), announced today the hiring of several new executives to support the company's continued overall global growth and focus on the design, manufacture and support of its products.

- | Ciaran Fox is the new vice president of quality and reliability for Enphase.Â Fox previously held key quality and product positions at Hitachi Global Storage Technologies and IBM, and he holds M.S. and Ph.D. degrees in Material Science and Engineering from Stanford University.
- | Martin Rogers has been appointed vice president of customer service and support.Â Rogers comes to Enphase with over 20 years experience, having also previously worked for Schneider Electric and in renewables at Power-One.
- | Steve Lapointe has been appointed vice president of human resources. Lapointe has 20 plus years of human resources experience leading global teams, and he joins Enphase from his most recent senior human resources position at Cadence Design Systems.

Enphase also announced the departure of Vice President of Engineering Dennis Hollenbeck, who has announced his retirement. Hollenbeck will remain at Enphase through the end of November. A search for his replacement is currently underway.

In addition to these new appointments, the company is currently recruiting for open positions in California, Idaho and internationally, including engineering, marketing, customer support and business development. For more information on open positions, please visit <http://enphase.com/company/careers/>.

About Enphase Energy

Enphase Energy delivers microinverter technology for the solar industry that increases energy production, simplifies design and installation, improves system uptime and reliability, reduces fire safety risk and provides a platform for intelligent energy management. Our semiconductor-based microinverter system converts energy at the individual module level and brings a system-based, high technology approach to solar energy generation. www.enphase.com
